DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 36 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 14 of U.S. Patent No. 7,141,742 (Barr). Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 14 of Barr via dependency from claim 8 of Barr claims, a printed circuit board comprising: a conductive layer (a first conductive plane); a via (via signal barrel) transecting the conductive layer (col. 8, lines 11-12); and an anti-pad around the via (first partially voided anti-pad), the anti-pad comprising a pattern of conductive material having a plurality of voids, wherein the pattern comprises a screen

Art Unit: 2841

pattern (col. 8, lines 39-40). The Examiner notes that a "screen pattern" inherently must contain a plurality of voids.

Allowable Subject Matter

The indicated allowability of claim 37 is withdrawn in view of the newly discovered reference(s) to Barr. Rejections based on the newly cited reference(s) Are as stated above.

Claims 1-6 and 9-36 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claim 1 states the limitation "wherein the pattern of conductive material is electrically isolated". This limitation, in conjunction with the other claimed features, was neither found to be disclosed in, nor suggested by the prior art. Claim 17 states the limitation "wherein the pattern of conductive material is electrically isolated". This limitation, in conjunction with the other claimed features, was neither found to be disclosed in, nor suggested by the prior art. Claim 24 states the limitation "wherein the partially voided anti-pad is electrically isolated". This limitation, in conjunction with the other claimed features, was neither found to be disclosed in, nor suggested by the prior art. Claim 35 states the limitation "the pattern of conductive material isolated from the conductive layer". This limitation, in conjunction with the other claimed features, was neither found to be disclosed in, nor suggested by, the prior art. Claim 36 states the limitation "the pattern of conductive material isolated from the conductive layer". This limitation, in conjunction with the other claimed features, was neither found to be disclosed in, nor suggested by, the prior art.

Response to Arguments

Applicant's arguments with respect to claim 37 have been considered but are moot in view of the new ground(s) of rejection.
